

User Guide

A visual guide for running your shop efficiently.

Start with Settings

Complete your shop profile, invoice details, contact information, and logo before daily operations.

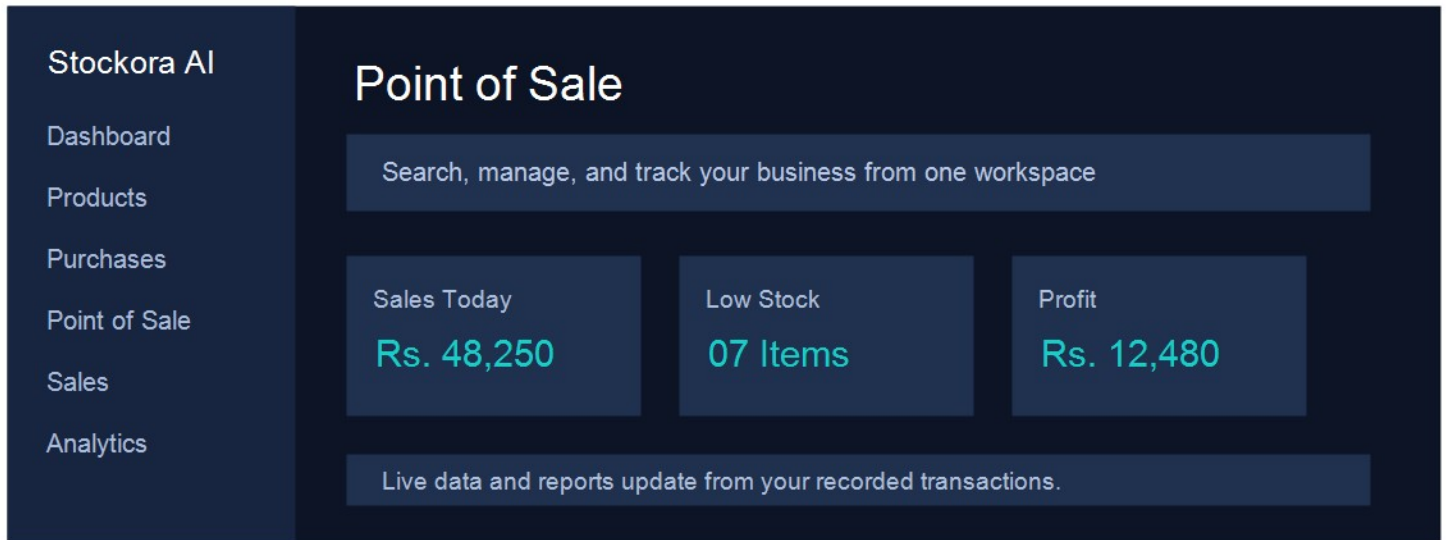

Daily operating flow

Record received stock, complete each sale in POS, then review low-stock alerts, credit dues, and reports.

Sales & Inventory

Use the right workflow to protect your data accuracy.

Products and Purchases

Create categories, add products with cost/selling prices and reorder limits, then record incoming stock through Purchases.

POS and invoices

Select products, confirm quantities, choose payment method, complete the sale, and print the invoice when required.

Returns and credit

Use Customer Returns and Credit Dues screens rather than manual stock changes.

Reports & Growth

Make confident decisions using real shop activity.
