CHAPTER 1

Introduction to Stockora AI

Platform overview, feature highlights & system requirements

1.1 What is Stockora AI?

Stockora AI is a comprehensive, cloud-based **Point-of-Sale (POS) and Inventory Management Platform** designed for modern retail businesses. Built on a multi-tenant architecture, it empowers shop owners to manage their entire business — from daily billing and stock tracking to running a fully branded online store — all from one unified dashboard.

Whether you run a small grocery store, a fashion boutique, an electronics shop, or a supermarket, Stockora AI adapts to your industry with its powerful AI features, theme engine, and commerce cloud.

□ **Core Philosophy**

Stockora AI brings enterprise-grade retail intelligence to every shop owner — without needing expensive hardware or complex software. All you need is a web browser.

1.2 Key Features Overview

Smart POS Billing

Fast barcode/search-based billing, discounts, multiple payment modes, instant invoice printing.

Inventory Control

Real-time stock levels, low-stock alerts, reorder points, expiry tracking, bulk import/export.

Commerce Cloud

Launch a branded online store, accept orders, track shipments — all synced with your POS inventory.

AI Decision Engine

Autopilot insights, brand scoring, product winner/loser analysis, smart restocking recommendations.

Analytics & Reports

Sales charts, profit calculator, daily targets, Z-report, revenue breakdowns, customer analytics.

Theme Marketplace

25 industry-specific themes with live preview, one-click install, rollback, export/import, backups.

Customer Management

Customer profiles, purchase history, credit/dues tracking, bulk buyer management.

Finance Tools

Expense tracker, credit & dues, profit calculator, purchase history, revenue analytics.

1.3 System Requirements

Requirement	Minimum	Recommended
Web Browser	Chrome 90+, Firefox 88+, Edge 90+	Chrome 120+ / Edge 120+
Internet Connection	1 Mbps	5 Mbps or faster
Screen Resolution	1024 × 768	1366 × 768 or higher
JavaScript	Must be enabled in browser	
Cookies	Must be enabled (session management)	
Device	Desktop / Laptop	Desktop with external display for POS

 **Important**

Stockora AI is a web application. No software installation is required on your device. Bookmark the URL and access from any browser, anywhere.

CHAPTER 2

Getting Started — Login & Dashboard

How to log in, navigate the dashboard, and enable AI Autopilot mode

2.1 Accessing the Platform

Open your web browser and navigate to the Stockora AI URL provided by your administrator (e.g., `http://yourdomain.com`). You will be redirected to the login page automatically.

i Two Portals

Shop Portal: For shop owners and staff — access `/login.php`

Admin Portal: For platform administrators — access `/login.php?role=admin`

2.2 Login Process

1 Open Login Page

Navigate to your Stockora URL. Select "Shop Login" tab.

2 Enter Credentials

Type your registered email address and password in the respective fields.

3 Click Login

Press the "Login" button. On success you will be redirected to your Shop Dashboard.

4 Subscription Check

If your subscription has expired, you will be redirected to the Subscription page to renew before accessing any module.

❏ Security Tips

- Never share your password with anyone
- Always click "Logout" before closing the browser on shared computers
- Sessions automatically expire after 1 hour of inactivity

2.3 Dashboard Overview

The **Dashboard** (`/shop/index.php`) is your command centre. It gives you a real-time snapshot of your shop's performance.

Widget	Description
Today's Sales	Total revenue collected today (cash + credit combined)
Today's Orders	Number of sale transactions processed today
Total Products	Count of active products in your inventory
Low Stock Alerts	Products whose quantity is at or below the reorder threshold
Sales Chart	7-day bar chart showing daily revenue trends
Profit Estimate	Approximate profit based on cost vs. sale price data
Top Products	Best-selling items this month
Recent Sales	Latest 5 transactions with quick-action links

2.4 Autopilot AI Mode

Autopilot Mode activates the AI Decision Engine on your dashboard. When enabled, the system analyzes your last 30 days of data and generates actionable insights.

1 Find the Autopilot Toggle

On the dashboard, look for the "Autopilot" switch at the top of the page.

2 Enable It

Click the toggle to ON. The page will refresh and AI panels will appear.

3 Read Your Insights

View Brand Score, Product Engine (Winners/Losers), and AI Insights cards.

□ AI Autopilot Panels

Brand Score — A 0–100 score grading your business health based on margins, sales velocity, and stock.

Product Engine — Flags products that are "Winners" (high margin + high sales) vs. "Losers" (low performance).

AI Insights — Text recommendations: "Restock Product X", "Price Product Y higher", "Reduce slow-moving items."

CHAPTER 3

Products & Categories

Managing your complete product catalog and inventory

3.1 Adding a Category

Categories help organize your products. Navigate to **Categories** from the sidebar menu.

1 Open Categories Page

Go to Sidebar → Products → Categories.

2 Click "Add Category"

Fill in the category name (e.g., "Electronics", "Clothing"). Optionally add a description and set status to Active.

3 Save

Click Save. The new category will appear in the list and be available in the product form.

3.2 Adding / Editing Products

Navigate to **Products** in the sidebar. Click the **" + Add Product "** button.

Field	Description	Required?
Product Name	Full name of the product	Yes
SKU / Barcode	Unique product code for scanning	Optional
Category	Select from your categories list	Yes
Sale Price	Price charged to customer	Yes
Cost Price	Your purchase cost (for profit calculation)	Optional
Stock Quantity	Current stock count	Yes
Reorder Level	Minimum qty before low-stock alert triggers	Optional
Expiry Date	For perishable products	Optional

Field	Description	Required?
Unit	e.g., pieces, kg, liters, box	Optional
Status	Active or Inactive	Yes

Quick Tip

Set the **Reorder Level** for every product. This ensures you get alerts before running out of stock. A reorder level of "5" means: alert when stock drops below 5 units.

3.3 Stock Management

Go to **Stock Report** for a full stock view. You can:

- View current stock levels for all products side-by-side
- Filter by category or search by product name
- See products with stock below reorder threshold highlighted in red
- Manually adjust stock quantities (Stock Adjustment feature)

3.4 Import & Export

Stockora supports bulk operations via CSV files for fast data management.

Action	Location	File Format
Import Products	Sidebar → Import	CSV (download template first)
Export Products	Sidebar → Export	CSV
Download Template	Sidebar → Download Template	CSV (pre-formatted headers)

Import Rules

Always download the import template first. Column order must match exactly. Duplicate SKUs will update existing products rather than create duplicates.

CHAPTER 4

POS Billing System

How to process sales, apply discounts, and generate invoices

4.1 How to Make a Sale

The POS screen (**Sidebar** → **POS Billing**) is the heart of daily operations. It is designed for speed — a complete sale takes under 30 seconds.

1 Open POS

Navigate to POS Billing from the sidebar. The screen is divided into a product search panel (left) and a cart (right).

2 Search or Scan Products

Type product name or SKU in the search bar, or use a barcode scanner. Click a product to add it to the cart.

3 Adjust Quantities

In the cart, use + / – buttons or type the quantity directly. The subtotal updates in real-time.

4 Select Customer (optional)

Choose a customer from the dropdown to link the sale to their profile for history tracking.

5 Apply Discount (optional)

Enter a discount amount (fixed PKR) or percentage at the bottom of the cart.

6 Select Payment Method

Choose Cash, Card, or Credit. For credit sales, the amount will be added to the customer's dues.

7 Confirm Sale

Click the "Complete Sale" button. An invoice number is generated automatically and stock is deducted.

8 Print Invoice

A print dialog appears automatically. You can also reprint any invoice from Sales History.

4.2 Discounts & Custom Prices

Discount Type	How to Apply	Where It Shows
Cart-Level Discount	Enter value in Discount field at cart bottom	Deducted from cart total

Discount Type	How to Apply	Where It Shows
Item-Level Price Override	Click on price of any cart item to edit it	Custom price for that item only
Bulk Buyer Pricing	Select bulk buyer customer — auto-applies their rate	Price overrides automatically

4.3 Payment Methods

Method	Behaviour	Affects Dues?
☐ Cash	Full payment received. Sale completed immediately.	No
☐ Card	Card payment recorded. Sale completed immediately.	No
☐ Credit	Sale recorded on credit. Amount added to customer dues.	Yes

4.4 Invoice Generation

Every completed sale generates a unique invoice with:

- **Invoice Number** — Auto-generated sequential number (e.g., INV-00001)
- **Shop Name & Logo** — From your shop settings
- **Item list** with quantities, unit prices, and line totals
- **Discount breakdown** — if any discount was applied
- **Grand Total** and payment method
- **Date & Time** of the transaction

☐Reprinting Invoices

Go to **Sales History** → **Find the sale** → **Click the Invoice icon**. The invoice opens in a new window ready to print.

CHAPTER 5

Sales, Purchases & Expenses

Track all financial transactions and generate end-of-day reports

5.1 Sales History

Navigate to **Sidebar** → **Sales History** to view all completed transactions.

- Filter by date range, customer name, payment method, or invoice number
- Click any row to see the full sale breakdown
- Reprint invoice from the Actions column
- Delete a sale (with stock reversal confirmation)
- Export filtered sales data to CSV

⚠ Deleting Sales

Deleting a sale reverses the stock deduction. Use only for genuine entry errors. All deletions are logged in the activity record.

5.2 Purchase Entry

Record supplier purchases in **Sidebar** → **Purchase Entry**. This updates your cost price data and can optionally add to stock.

Field	Description
Supplier Name	Who you purchased from
Product	Search and select the product received
Quantity	Units received
Cost Per Unit	What you paid per unit (updates product cost price)
Total Amount	Auto-calculated: Qty × Cost
Payment Status	Paid / Pending / Partial

Field	Description
Invoice Ref	Supplier's invoice number for reference

5.3 Expense Tracker

Record non-sales expenses in **Sidebar** → **Expense Tracker**:

- Rent, electricity, salaries, fuel, maintenance, etc.
- Each expense has a category, amount, date, and optional notes
- Expenses appear in the Profit Calculator to give you true net profit figures

5.4 Z-Report (End of Day)

The **Z-Report** is an end-of-day summary covering the entire business day. Access it via **Sidebar** → **Z-Report**.

☐What a Z-Report Contains

Total Sales Value · Number of Transactions · Cash vs. Card vs. Credit Breakdown · Total Discounts Given · Top Selling Products of the Day · Total Expenses · Net Profit Estimate · Opening & Closing Stock Value

The Z-Report can be printed directly for your records. It is auto-populated from the current day's data — no manual entry required.

CHAPTER 6

Customers & Credit Management

Customer profiles, credit limits, dues tracking, and bulk buyer management

6.1 Customer Profiles

Access customer management via **Sidebar** → **Customers**.

- Add customers with name, phone, email, and address
- View complete purchase history per customer
- See total lifetime spend and outstanding credit balance
- Mark customers as VIP for priority tracking
- Search and filter by name, phone, or outstanding balance

6.2 Bulk Buyers

Bulk Buyers (**Sidebar** → **Bulk Buyers**) are wholesale customers who get special pricing. These differ from regular customers in that they have pre-negotiated per-product prices.

Feature	Regular Customer	Bulk Buyer
Price	Standard sale price	Custom negotiated rate per product
Discount	Manual at POS	Auto-applied at POS when selected
Credit	Optional	Often extended credit terms
Use Case	Retail walk-in	Wholesale / B2B accounts

6.3 Credit & Dues Tracking

Navigate to **Sidebar** → **Customer Credit & Dues** to see all outstanding balances.

1 View Dues

The page shows all customers with a remaining balance, sorted by outstanding amount.

2 Record a Payment

Click "Collect Payment" next to a customer. Enter the amount received. The balance updates immediately.

3 Payment History

View full credit history per customer — when credit was given and when payments were made.

4 Print Ledger

Print a customer's ledger statement directly from their profile page.

☐ Credit Warning

If a customer's outstanding balance exceeds their credit limit, the POS will show a warning before processing another credit sale. You can override this if you choose.

CHAPTER 7

Online Store (Commerce Cloud)

Launch your branded online store, customize themes, and manage orders

7.1 Setting Up Your Store

Commerce Cloud lets you launch a public-facing online store at a custom URL (e.g., `yourdomain.com/store/your-shop-name`). Your POS inventory automatically syncs with the online store — no double-entry required.

- 1

Go to Commerce Cloud
Sidebar → Commerce Cloud. Choose "Store Setup" if launching for the first time.
- 2

Run Store Wizard
The Store Wizard walks you through: Shop Name, Logo, Store Slug (URL), Contact Info, and Launch settings.
- 3

Choose a Theme
Pick a theme from the Theme Marketplace (25 themes available). Click "Live Preview" before applying.
- 4

Launch Store
Toggle "Store Status" to Active. Your store is now live and accessible via its public URL.

□ Your Store URL

Once launched, your store is accessible at: `/store/your-slug`
Share this URL with your customers on WhatsApp, social media, or add it to your business card.

7.2 Theme Marketplace

Navigate to **Sidebar** → **Theme Marketplace**. You will see a grid of 25 professional themes organized by industry.

Industry Category	Available Themes
Fashion & Clothing	Luxury Fashion, Streetwear Bold, Minimalist Mode
Electronics & Tech	Tech Dark Pro, Cyber Neon, Digital Frost
Food & Grocery	Fresh Grocery, Organic Earth, Fast Food Neon

Industry Category	Available Themes
Health & Beauty	Beauty Rose, Wellness Green, Spa Calm
Home & Decor	Home Luxe, Nordic Minimal, Industrial Loft
Jewelry & Luxury	Gold Prestige, Silver Minimal, Diamond Dark
Books & Education	Library Classic, Academic Blue, Knowledge Hub
Sports & Fitness	Sports Energy, Outdoor Adventure
Enterprise	Enterprise X

Theme Actions Available

Action	Description
☐ Live Preview	Opens your store in an iframe with the theme applied — before saving
☐ Install Theme	Applies the theme to your live store. Previous theme is auto-saved to rollback
☐ Rollback	Instantly reverts to the previously installed theme
☐ Duplicate	Creates a copy of the theme in your custom themes for editing
☐ Backup	Takes a manual snapshot of current theme settings (up to 10 backups stored)
☐ Export	Downloads all theme settings as a JSON file for sharing or backup
☐ Import	Uploads a JSON theme file to apply a saved or shared theme
☐ Version History	Shows complete history of all theme changes and available backups

☐ **Pro Tip — Use Live Preview First**
Always click **Live Preview** before installing a theme. It shows exactly how your store will look without making any changes. Only click **Install** when you're satisfied with what you see.

7.3 Store Customization

Beyond themes, **Store Customization (Sidebar → Store Customize)** gives you 11 tabs of detailed control:

Tab	What You Can Configure
General	Store name, tagline, logo, favicon, contact details
Appearance	Active theme, accent color, font selection
Homepage	Banner images, featured categories, hero text
Products	Products per page, sort defaults, display options
Cart & Checkout	Minimum order, delivery fee rules, checkout fields
Payments	Accepted payment methods, bank details for transfers
SEO	Meta title, description, keywords, Google Analytics ID
Social	Facebook, Instagram, WhatsApp, Twitter links
Shipping	Delivery zones, flat rates, free shipping threshold
Notifications	Order confirmation messages, WhatsApp notification toggle
Advanced	Custom CSS, custom HTML header/footer injections

7.4 Online Orders Management

View and manage all orders placed through your online store at **Sidebar** → **Online Orders**.

Order Status	Meaning	Next Action
Pending	Order received, not yet confirmed	Review and Confirm or Cancel
Confirmed	Order accepted, being prepared	Mark as Shipped when dispatched
Shipped	Order dispatched to customer	Awaiting delivery confirmation
Delivered	Customer received the order	No further action needed
Cancelled	Order cancelled by shop or customer	Stock is automatically restored

CHAPTER 8

Analytics & Reports

Deep business intelligence through charts, profits, targets, and alerts

8.1 Analytics Dashboard

Access **Sidebar** → **Analytics & Tools** for a full analytics suite.

Report Section	What It Shows
Sales Trend	Daily / weekly / monthly revenue line chart for any date range
Top Products	Best-selling products ranked by revenue or quantity sold
Category Performance	Revenue breakdown by product category (pie chart)
Customer Analysis	Top customers by spend, new vs. returning ratio
Payment Methods	Cash vs. Card vs. Credit split (donut chart)
Hourly Sales	Peak selling hours heatmap for staffing optimization
Monthly Comparison	Current month vs. previous month revenue comparison

8.2 Profit Calculator & Price Manager

Navigate to **Sidebar** → **Profit Calculator** to analyze your margins.

- View gross profit per product (Sale Price – Cost Price)
- See overall business net profit (Gross Profit – Expenses)
- Bulk update sale prices with target margin tool — enter your desired margin %, auto-calculates new price
- Compare product margins side-by-side to identify underpriced items

Price Manager Tip

Use the **"Set Margin"** tool to ensure every product is priced at a minimum 20% margin. Enter 20 in the margin field and click "Apply" — the system will flag all products below this threshold.

8.3 Daily Target Tracker

Sidebar → **Daily Target** lets you set a revenue goal for the day and track progress in real-time.

- Set a daily target (e.g., PKR 50,000)
- A progress bar fills as sales accumulate during the day
- Shows: Target vs. Achieved vs. Remaining
- Historical target achievement log is maintained

8.4 Reorder & Expiry Alerts

Proactive inventory health tools in **Sidebar** → **Reorder Alerts**:

Alert Type	Trigger Condition	Action
☐ Low Stock Alert	Product qty $\leq$ Reorder Level	View, record purchase, dismiss
☐ Near Expiry	Expiry date within 30 days	Mark for sale, discount, dispose
☐ Expired	Expiry date has passed	Remove from sale, adjust stock

CHAPTER 9

AI Decision Engine (AI Lab)

Using Stockora's built-in artificial intelligence for business growth

9.1 AI Insights (Autopilot)

Enable Autopilot Mode on your Dashboard (Chapter 2.4) to see AI-generated insights. The AI analyzes:

- **30-day sales velocity** per product (units sold per day)
- **Profit margins** across your full catalog
- **Stock health** — days of inventory remaining at current sales rate
- **Customer buying patterns** — frequency and average spend

Based on this analysis, the AI generates **3–8 actionable insights** such as:

- *"Restock Samsung Charger — will run out in 4 days at current sales rate"*
- *"Increase price of Wireless Earbuds — margin is only 8%, recommend 25%"*
- *"Promote Red T-Shirt — high margin (42%) but low sales velocity"*

□ **How the AI Works**

Stockora AI uses **rule-based scoring algorithms** trained on retail performance patterns. It calculates a composite score for each product across 5 dimensions: Margin Score · Sales Velocity · Stock Health · Trend Direction · Customer Demand Signals.

9.2 Product Engine

Access the full **Product Engine** via **Sidebar** → **AI Lab**. It classifies every product into one of four quadrants:

Classification	Criteria	Recommended Action
□ Winners	High margin AND high sales velocity	Ensure always in stock, consider premium placement
□ Hidden Gems	High margin, low sales	Promote and market heavily
□ Volume Movers	Low margin, high sales	Monitor; consider slight price increase

Classification	Criteria	Recommended Action
⚠ Losers	Low margin AND low sales	Review pricing, discontinue, or clearance sale

9.3 Brand Score

The **Brand Score** is a composite 0–100 metric that grades the overall health of your business:

Score Range	Grade	Interpretation
85 – 100	☐A+ Excellent	Your business is thriving. Maintain and scale.
70 – 84	☐A Good	Strong performance with minor optimization areas.
55 – 69	☐B Average	Decent performance; several areas need attention.
40 – 54	☐C Needs Work	Warning signs present. Take action on AI recommendations.
0 – 39	☐D Critical	Serious issues. Immediate action required.

☐Improving Your Brand Score

The score is recalculated daily. To improve it: (1) Add cost prices to all products so profit margins can be calculated. (2) Regularly record purchases to keep stock data accurate. (3) Set reorder levels to avoid stockouts. (4) Record all expenses for accurate net profit data.

CHAPTER 10

Settings & Subscription

Configure your shop profile, manage users, and handle subscription renewal

10.1 Shop Settings

Navigate to **Sidebar** → **Settings** to configure your shop profile.

Setting Group	Configuration Options
Shop Profile	Name, owner name, phone, email, address, city
Logo	Upload your shop logo (JPG/PNG, max 2MB). Appears on invoices and store.
Currency	Default currency symbol for display (PKR by default)
Tax Settings	Enable/disable GST, set tax percentage
Invoice Settings	Invoice prefix, footer text, terms & conditions text
Notifications	Enable low-stock email alerts, expiry email alerts

10.2 User Management

If your subscription includes multi-user access, manage staff accounts under **Settings** → **Users**.

Role	Permissions
Owner	Full access to all modules, settings, financial data
Manager	All modules except settings changes and subscription
Cashier	POS billing only — cannot view analytics, purchase history, or settings

- 1

Add Staff Member
Go to Settings → Users → Add User. Enter name, email, password, and assign role.
- 2

Share Credentials
Share the email and password securely with the staff member. They log in at the same URL.

3 Deactivate When Needed

To revoke access, set the user status to Inactive. They cannot log in but data is preserved.

10.3 Subscription Management

Navigate to **Sidebar** → **Subscription** to view your current plan and renewal status.

Status	Indicator	Required Action
Active	Active with expiry date	None — continue using Stockora normally
Expiring Soon	Expires in X days	Contact your Stockora administrator to renew
Expired	Expired	All features locked; renew to restore access immediately

Subscription Expiry

When your subscription expires, you will be redirected to the Subscription page on every login attempt. **Your data is NOT deleted** — it is preserved and restored immediately upon renewal. Contact your Stockora administrator with your payment to get renewed.

Subscription Pricing

Base plan: **PKR 10,000 / month** per shop. Multi-month plans (3, 6, 12 months) may be available at a discount — ask your administrator.
